<b>06/29/15</b>	<b>What PSP roles are available for Bulkload agencies?</b>
	Within the PO category in the EE1 Role Guide, the PSP Adjustment Processor role provides the ability to override any defaults established. Other roles (PO Requestor, PO Processor, and PO Contract Processor) provide assigned users the ability to make changes to POs/contracts and set the PSP method so it defaults to all POs or Requisitions. These roles also allow for an override of defaults assigned to POs for a Purchasing BU. There are no restrictions on role assignments regarding bulkload agencies.
