

Posted/Revised Date	Enterprise Services Automation (ESA)
12/18/2015	When using a Time Distribution System (TDS), i.e. LATS, can a person charge their time to a Federal Grant but not be paid from the Federal Grant funds?
	Yes, that is exactly what we do in ESA with TDS; there is a difference between the hours and dollars. Employees can be paid out of a general fund but their hours are recorded against the federal grant.
12/18/2015	Can a contract be set up for a grant where each contract line would represent one year of the grant?
	Yes, you can also set it up so that each project represents a contract line.
12/18/2015	Can coordinates be used for Project locations rather than addresses?
	Yes, this can be done by the agency when the location codes are created.
12/18/2015	Can a Project be assigned to multiple Programs?
	No, a Project can only be assigned to one Program. A Program can have multiple Projects assigned to it.
12/18/2015	Now that Project Budgets are tracked in Project Costing, do ESA agencies have to recreate the effort of putting them into Commitment Control (KK)?
	No, Project Budgets are entered into Project Costing and automatically pushed to KK.
